

Prosek Security specialises in the delivery of innovative services to public and private sectors of industry. We work closely with all stakeholders to provide workable solutions whilst ensuring compliance to applicable statutory and regulatory requirements.

Director, Management and Employees are all committed to identifying and managing the environmental impacts resulting from our business activities, to improving our environmental performance and the prevention of pollution:

Establishment of environmental objectives and targets to aspects and impacts within our control.

Implementation, review, maintenance and continual improvement of our management system and practices to meet business needs, AS/NZS 14001, client and other regulatory obligations. The implementation of appropriate corrective action.

Engagement of employees and subcontractors that are appropriately qualified and competent to perform their duties.

Practice of responsible resource management and waste disposal including the promotion of the efficient use, reuse and recycling of resources to minimise the depletion of natural resources, production of waste and the prevention of pollution.

This policy is reviewed as part of Management Review.

Name: David Thalhofer

Title: Executive Director
